Health & Safety

# Health & Safety

JYM has a wealth of experience in the provision of Health & Safety Services under the CDM Regulations 2015. Our CDM Advisors & Principal Designers are experts in advising Clients & Designer on the management of Health & Safety issues at all stages of the project, as an integrated part of the design process.

Our in-house professionals provide services tailored to clients, contractors and developers to ensure compliance with CDM Regulations and to minimise project risks.

Our recent clients include:

- Lancaster RC Diocese
- OCS Group Ltd
- HM Courts Service
- University of Central Lancashire
- Kepak Group
- Eric Wright Group
- Ribble Cycles
- Natural England

We act either as Health & Safety Advisors to assist clients in discharging their responsibilities under the Regulations or as Principal Designers, co-ordinating the design process. All JYM staff are trained to act as Designers under the Regulations on all projects.

Our Health & Safety professionals are Incorporated Members of the Association for Project Safety and receive ongoing training on changing legislation and case law. They are therefore able to provide appropriate advice tailored to specific client and project needs..
